PROJECTS

Monolith CSS

getmonolith.io

A powerful and flexible CSS framework that emphasizes a lighter mental load for front-end development. E.g., memorize fewer utility classes and write vanilla HTML to get an expected result of a button or input field. Components include a flexbox grid, buttons, typography, forms, with configurations for brand attributes like colors, fonts, and spacing.

Little Webpack Template

<https://github.com/geotrev/little-webpack-template>

Create one or multi-page apps quickly with this highly flexible webpack + react starter kit. Includes mocha/chai-enzyme for unit tests, gzip compression, SCSS for styles, and React with React Router DOM. Includes configurations for development and production. Deploys to Heroku out of the box.

EXPERIENCE

Software Engineer (Front-End)

Oct. 2017 – Present

Scribd

- Improve and maintain front-end strategies with brand utilities such as a CSS grid and internal styleguide.
- Helped synchronized development with design systems through implementation strategy with Webpack + React package libraries.
- Rebuilt About Us subsite from the ground up.

Product Designer

May – Oct. 2017

Scribd

- Ideated, designed, documented, and validated design solutions for multi-platform e-book / audiobook reader application.
- Defined and prototyped UI components to fit brand and assist development implementation.
- Redesigned audiobook player to be responsive and accessible

PROGRAMMING

HTML / HAML

CSS / SCSS

JavaScript (ES6)

jQuery

Nodejs

Webpack

React

Ruby on Rails

SKILLS & CONCEPTS

Responsive Web Design

Design Systems

Object-Oriented Prog.
